

Behind the Numbers

AAA is a federation of motor clubs serving more than 49 million members in the United States and Canada through more than 1,100 offices.

Founded in 1902, AAA is a not-for-profit, fully taxpaying corporation. Its purpose is two-fold: give members a full range of automotive and travel-related services and promote the interests of motorists and travelers through legislative and educational activities.

AAA has published *Your Driving Costs* since 1950. That year, driving a car 10,000 miles annually cost 9 cents a mile, and gasoline sold for 27 cents per gallon.

Because it incorporates significant changes to driving cost calculations — most notably the averaging of costs for multiple top-selling vehicles in each size/type category — this edition of *Your Driving Costs* is not comparable to previous editions. The changes in methodology are designed to provide more accurate driving costs and better reflect current consumer vehicle purchasing habits.

Methodology The process used to estimate annual driving costs for this brochure is proprietary to AAA. It incorporates standardized criteria designed to model the average AAA member's use of a vehicle for personal transportation over five years and 75,000 miles of ownership.

The use of standardized criteria ensures AAA's estimates are consistent when comparing driving costs of different vehicle makes and models. Actual driving costs will vary based on individual driving habits, location, operating conditions and other factors.

Estimates are provided to help consumers make informed vehicle purchase decisions and budget for annual automotive expenses.

Your Driving Costs 2006

*How much
are you
really paying
to drive?*

How Much Does it Cost to Drive?

Following are AAA average per-mile costs and the composite average cost for three size categories of sedans:

AAA Average Costs Per Mile

miles per year	10,000	15,000	20,000
Small Sedan	50.5 cents	41.7 cents	37.6 cents
Medium Sedan	62.4 cents	53.1 cents	48.8 cents
Large Sedan	72.9 cents	61.9 cents	56.5 cents
composite average	62.0 cents	52.2 cents	47.7 cents

Detailed driving costs for small, medium and large sedans are provided on pages 6 and 7. Driving costs for four-wheel-drive sport utility vehicles and minivans are listed on page 8. Though not part of the composite AAA average, SUV and minivan information is included to help buyers estimate operating costs for these types of vehicles.

Driving costs in each category are based on average costs for five top-selling models selected by AAA. By size category, they are:

- Small sedan — Chevrolet Cobalt, Ford Focus, Honda Civic, Nissan Sentra and Toyota Corolla.
- Medium sedan — Chevrolet Impala, Ford Fusion, Honda Accord, Nissan Altima and Toyota Camry.
- Large sedan — Buick Lucerne, Chrysler 300, Ford Five Hundred, Nissan Maxima and Toyota Avalon.

Selected SUV models include Chevrolet TrailBlazer, Ford Explorer, Jeep Grand Cherokee, Nissan Pathfinder and Toyota 4Runner. Minivans include Chevrolet Uplander, Dodge Grand Caravan, Ford Freestar, Honda Odyssey and Toyota Sienna.

What's Covered

AAA's analysis covers vehicles equipped with standard and optional equipment including automatic transmission, air conditioning, power steering, antilock brakes and cruise control, to name a few.

✓ **Fuel** Fuel costs were based on \$2.405 per gallon, the late-2005 U.S. price from AAA's Fuel Gauge Report: www.fuelgaugereport.com. Fuel mileage is based on Environmental Protection Agency fuel-economy ratings weighted 60 percent city and 40 percent highway driving.

✓ **Maintenance** Costs include retail parts and labor for normal, routine maintenance as specified by the vehicle manufacturer. They also include the price of a comprehensive extended warranty with one warranty claim deductible of \$100 and other wear-and-tear items that can be expected to require service during five years of operating the vehicle. Sales tax is included on a national average basis.

✓ **Tires** Costs are based on the price of one set of replacement tires of the same quality, size and ratings as those that came with the vehicle. Mounting, balancing and sales tax also are included.

✓ **Insurance** AAA based its insurance costs on a full-coverage policy for a married 47-year-old male with a good driving record, living in a small city and commuting three to 10 miles daily to work. The policy includes \$100,000/\$300,000 coverage with a \$500 deductible for collision and a \$100 deductible for comprehensive coverage.

✓ **License, Registration and Taxes** Costs include all governmental taxes and fees payable at time of purchase, as well as fees due each year to keep the vehicle licensed and registered. Costs are computed on a national average basis.

✓ **Depreciation** Depreciation is based on the difference between new-vehicle purchase price and estimated trade-in value at the end of five years.

✓ **Finance** Costs are based on a five-year loan at 6 percent interest with a 10 percent down payment. The loan amount includes taxes and the first year's license fees, both computed on a national average basis.

When determining your annual driving costs, be sure to include all vehicle-related expenses incurred during the year.

Figuring Your Costs

To figure your fuel cost, begin with a full tank of fuel and write down the odometer reading. Each time you fill up, note the number of gallons, how much you pay and the odometer reading. These figures can then be used to calculate average miles per gallon and cost of fuel per mile. For example:

Gas Cost Per Mile

gallons	cost*	odometer
beginning		8,850
12.4	\$29.82	9,136
9.5	\$22.85	9,355
15.7	\$37.76	9,717
37.6	\$90.43	9,717
		- 8,850

miles driven = 867

miles per gallon: $867 \div 37.6 = 23.1$ mpg

gas cost per mile: $\$90.43 \div 867 = 10.43$ cents

* cost per gallon \$2.405

To determine your driving costs accurately, keep personal records on all the costs listed below. Use this worksheet to figure your total cost to drive:

Annual Cost Per Mile

costs	yearly totals
operating costs	
gas per mile	_____
total miles driven	x _____
total gas	= _____
maintenance	+ _____
tires	+ _____
total operating costs	+ = _____
ownership costs	
depreciation	_____
insurance	+ _____
taxes	+ _____
license and registration	+ _____
finance charges	+ _____
total ownership costs	+ = _____
other costs (washes, accessories, etc.)	+ _____
total driving costs	= _____
total miles driven	÷ _____
cost per mile	= _____

Driving Costs

*Planning a vacation?
Figure at least \$15.10 per 100
miles for gas, maintenance and
tires for a car averaging 25.8 mpg.*

Vacation Planning

AAA's suggested budget for a family of four

— two adults and two children — is at least \$261 per day for lodging and meals, plus \$15.10 per 100 miles for gas, tires and maintenance with the car averaging 25.8 miles per gallon.

Lodging The average cost for lodging is \$141 per night, based on the most recent rates charged by approved accommodations listed in AAA TourBook® guides. This rate includes an extra-person charge for children.

However, if children are within an age limit set by management — usually up to 14 — there may not be an extra charge.

Vacation spending depends on a family's preferences and means, but costs also vary by area.

Expect higher lodging rates in large metropolitan areas and at resorts in season.

To save on lodging, it's best to make advance reservations. If that's not possible, plan to arrive early for a wider selection of accommodations.

Meals For a family of four, AAA suggests budgeting at least \$120 a day for meals, not including tips or beverages.

Meal costs can be reduced by eating the main meal at midday to take advantage of lower lunch prices at restaurants. Many restaurants offer children's menus and "early bird" dinner specials at reduced prices.

Additional Costs In addition to lodging, food and driving costs, you should budget for admission fees, road and bridge tolls, recreation and shopping. If you don't carry credit cards, include an emergency fund in your vacation budget. For added security, AAA suggests carrying travel money such as prepaid money cards or travelers cheques. The AAA Visa TravelMoney card is a prepaid credit card that also offers 24-hour ATM access to cash in more than 120 local currencies. AAA members also can obtain fee-free travelers cheques from their local AAA office.

Business Travel

Although some firms continue to provide vehicles to full-time business travelers, a growing number of employees use their own vehicles for company business.

Companies use three primary methods to reimburse employees for business use of personal vehicles.

Getting Reimbursed

Flat mileage allowance. Many companies provide a flat allowance per mile, plus allowances for charges such as tolls and parking. This system minimizes bookkeeping but can result in overpayment or underpayment when compared to actual driving costs.

Fixed periodic reimbursement. Some companies provide a flat dollar reimbursement per day, week or month to cover business use of a personal vehicle. This, too, may result in overpayment or underpayment when compared to actual driving costs.

Combined fixed and mileage rate. Realizing that some automobile costs relate to miles driven (fuel, oil, tires and maintenance) and some to ownership (insurance, taxes, interest and depreciation), some companies provide a periodic fixed rate to cover ownership costs and a per-mile rate to cover business miles reported.

The per-mile rates listed in this brochure represent the AAA average of owning and operating a vehicle for a year. Because employees who use their

own vehicles for company business also use their vehicles for personal driving, reimbursement should not amount to 100 percent of the total costs.
